

Incident Response Retainer Program

You Can Count On Us to Get You Back to Business

SIXGEN's Incident Response Services offer significant advantages over traditional incident response services. By developing a solid understanding of your IT infrastructure up front, SIXGEN can respond to an incident more quickly and begin corrective actions. SIXGEN deploys physical devices that will maintain a persistent presence on your network. These devices allow SIXGEN to rapidly respond to an incident with operators who have immediate access to your network. This minimizes the threat by deploying the quickest, most efficient remediation strategy possible.

IRR The SIXGEN Way

- Highly Experienced Engineers
- Detailed and Discrete Response Team
- Pre-negotiated Retainer Agreement
- Fast Response Times
- Packaged with Full Network Assessment
- Proven & Organized Approach
- Limits Damage and Reduces Recovery Time and Cost

PROACTIVE

Penetration Test and Vulnerability Scanning Services are Included in Your Annual Agreement

COST-EFFECTIVE

Cut potential incident response costs by 43% and take proactive measures for 10% off list price all in one agreement

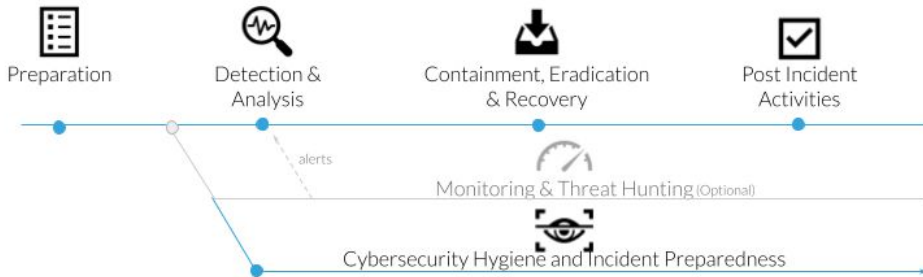

HIGH-QUALITY

Maintain access to SIXGEN's certified and credentialed Cyber Operators

Methodology

SIXGEN provides comprehensive incident response activities for IRR clients consisting of preparation; detection and analysis; containment, eradication and recovery; and post incident reporting. SIXGEN can optionally provide monitoring and threat hunting services to act as a full service advanced detection and response service provider. Our process, and implementation:

Enroll Today for Access to Professional Services Support When you Need It Most

With an IRR in place, you have a trusted partner on standby. This proactive approach can greatly reduce the response time and impact of breach. SIXGEN IRR plans include the following:

- On-call, 24/7 Incident Response support
- Annual Penetration Test
- Periodic updates to SOP
- Reduced Incident Response Rates/hr
- Bi-annual network vulnerability scans
- Reduced Hourly Rates for Professional Services

Choose One of Three Available Plans to Meet Your Incident Response Needs

IRR Premium (Auto Renewing)	Auto-renewal ensures ongoing protection and support in the event an incident occurs by avoiding a lapse in service. To add incremental value, IRR Premier Program participants are provided access to the lowest commercially available rate for cybersecurity and incident response services.
IRR Plus	Organizations can sign year to year service contracts. To add incremental value, IRR Plus Program participants are provided access to a discounted rate for mutually agreed upon cybersecurity services.
IRR Custom	Allows your business to offset identified risks by introducing solid controls to counter them. These services help businesses prepare for attacks and assist with the creation of procedures to enable a quick and successful recovery should the worst happen.

SIXGEN has cracked the code on meaningful ways to support cyber mission. Our workforce provides incident response, operational testing, red teaming, tool development, and continuous monitoring. We use specialized on-site and remote cybersecurity assessments to identify vulnerabilities within the most critical networks and IoT devices.
